Professional Experience:

Founder at Alem.com

December 2008 - Still

Alem.com is a web-based platform independent communication service. It supports many other communication services which includes send and receive messages such as MSN, Gtalk, Facebook, Twitter. Alem.com aims to provide you communication via funny tools and keep you closer to your friends.

CTO at !

March 2009 - Still

It'll be announced soon.

CTO at Petra

Jan 2008 - at the end December 2008

Lead Developer at CETECH

June 2006 - at the end December 2007

Cetech is The Leader Mobile VAS 3rd Party Company of Vodafone and increasing for the other GSM providers. All projects in here are working on two different platforms and markets in the same time: Internet & Mobile.

I designed and coded all infra-structure a few years ago at Febau with a junior PHP developer. And here, Mobile Service Delivery Platform is growing up day by day. I'm managing and developing MSDP and Product network (on a Netscaler Based Network Architecture) as a Service Manager.

They owe most popular affiliate network for advertisement. Affiliates are publishing thousands of our products on advertisement areas in their web sites. One of these products is GarantiArkadas.com. It was designed and developed by me one year ago. And now, it's the most popular dating portal in Turkey. All optimization and performance tuning are being applied by my team (3 Developers) under my control and my directions. Many times, I applied them myself to Database & Framework.

Senior Developer at OCTETH

Spring 2007

Octeth is a Start-up Company. They owe their own powerful Email Marketing Software product written in PHP. I had worked there on new version of Email Marketing Software and a few useful plugins. (OemMetrics, SubscribeMe, etc.)

Software Developer at FEBAU

August 2004 - June 2006

FEBAU was a Start-up Company. We were developing solutions for Mobile Market. MSDP, Web Based SMS Delivery System. They are still serving SMS APIs under a different company name.

By the way, I was a trainer in an education Brand of FEBAU. It was called as LITUX. Here are my subjects: Java, PHP, MySQL, Linux.
